

“Bruce Lipton’s book is the definitive summary of the new biology and all it implies. It is magnificent, profound beyond words, and a delight to read. It synthesizes an encyclopedia of critical new information into a brilliant yet simple package. These pages contain a genuine revolution in thought and understanding, one so radical that it can change the world.”

Joseph Chilton Pearce, Ph.D.

Author of *Magical Child*; *The Crack in the Cosmic Egg: New Constructs of Mind and Reality*; *Evolution’s End: Claiming the Potential of Our Intelligence* among others.

“Bruce Lipton's delightfully-written *The Biology of Belief* is a much needed antidote to the "bottom-up" materialism of today's society. The idea that DNA encodes all of life's development is being successfully employed in genetic engineering. At the same time, the shortfall of this approach is becoming evident. *The Biology of Belief* is a review of a quarter-century of pioneering results in Epigenetics, heralded by *The Wall Street Science Journal* in mid-2004 as an important new field. Its personal style makes it eminently readable and enjoyable.”

Karl H. Pribram, M.D., Ph.D., (Hon, Multi)

Professor Emeritus, Stanford University; Distinguished Research Professor, Cognitive Neuroscience at Georgetown University, Dept of Psychology and George Mason University, School of Computational Sciences

“History will record *The Biology of Belief* as one of the most important writings of our times. Bruce Lipton has delivered the missing link between the understandings of biomedicine of the past and the essentials of energetic healing of the future. His complex insights are expressed in a readily understandable fashion with a style that welcomes the scientist and the non-scientist on an equal footing. For anyone interested in health, the well-being of the species and the future of human life. The implications of the perspectives outlined have the potential to change the world as we know it. Bruce Lipton's understandings and his concise expression of them are sheer genius.”

Gerard W. Clum, D.C.

President, Life Chiropractic College West

“Powerful! Elegant! Simple! In a style that is as accessible as it is meaningful, Dr. Bruce Lipton offers nothing less than the long sought-after "missing link" between life and consciousness. In doing so, he answers the oldest questions, and solves the deepest mysteries, of our past. I have no doubt that *The Biology of Belief* will become a cornerstone for the science of the new millennium.”

Gregg Braden

New York Times best selling author of *The God Code* and *The Isaiah Effect*

“In this paradigm-busting book, Bruce Lipton delivers a TKO to Old Biology. With a left to Darwinian dogma and a right to allopathic medicine, he breaks out of the physicalist box into enlightenment on the mind/body (belief/biology) system. Must read, much fun.”

Ralph Abraham, Ph.D.

Professor of Mathematics, University of California at Santa Cruz. Author of *Foundations of Mechanics; Dynamics, the Geometry of Behavior; and Chaos, Gaia, Eros.*

“*The Biology of Belief: Unleashing the Power of Consciousness, Matter and Miracles* – is a milestone for evolving humanity. What Dr. Bruce Lipton has provided through his amazing research and this inspiring book is a new, more awakened science of human growth and transformation. Instead of being limited by the genetic or biological constraints that humanity has been programmed to live by, humanity now has before it a way of unleashing its true spiritual potential with the help of simply transformed beliefs guided by ‘the gentle and loving hand of God.’ A definite must read for those dedicated to the mind/body movement and to the true essence of healing.”

John F. Demartini, D.C.

Best selling author of *Count Your Blessings: The Healing Power of Gratitude and Love* and *The Breakthrough Experience: A Revolutionary New Approach to Personal Transformation*

“Finally, a compelling and easy-to-understand explanation of how your emotions regulate your genetic expression! You need to read this book to truly appreciate that you are not a victim to your genes but instead have unlimited capacity to live a life overflowing with peace, happiness and love.”

Joseph Mercola, O.D.

Founder of www.mercola.com <<http://www.mercola.com/>> the world's most visited natural health web site.

“Dr. Lipton is a genius - his breakthrough discoveries give us tools for regaining the sovereignty over our lives. I recommend this book to anyone who is ready and willing to take full responsibility for themselves and the destiny of our planet.”

LeVar Burton
Actor/Director

“This book is an absolute must read if you want to know, from a scientific view point, that your lifestyle is in control of your health rather than your genetics. From a scientific viewpoint, Lipton demonstrates that the mind is more powerful than drugs to regain our health. The information reveals that your health is more your responsibility than just being a victim of your genes. When I started reading this book, I could not stop until it was finished.”

M.T. Morter, Jr., D.C.
Founder of Morter Health System and developer B.E.S.T. Technique

“This is a courageous and visionary book that provides solid evidence from quantum biology to dispel the myth of genetic determinism—and implicitly, victimhood. Dr. Bruce Lipton brings a solid scientific mind to not only inform but to transform and empower the reader with the realization that our beliefs create every aspect of our personal reality. A provocative and inspiring read!”

Lee Pulos, Ph.D., ABPP
Author of *Miracles and Other Realities* and *Beyond Hypnosis*

“Dr. Lipton’s revolutionary research has uncovered the missing connections between biology, psychology and spirituality. If you want to understand the deepest mysteries of life, this is one of the most important books you will ever read.”

Dennis Perman, D.C.
Co-Founder, The Master’s Circle

I finished reading this book with the same sense of profound respect I have when I am with Bruce Lipton – that I have been touched by a revolutionary sense of the truth. He is both a scientist and a philosopher; a scientist in that he provides us with tools to alter cultural consciousness; and a philosopher because he challenges our beliefs about the very nature of our perceived reality. He is helping us create our own futures.

Guy F. Riekeman, DC
